

Please reject NAB petition 04-160. XM provides a service that is not the same as regular radio, it is better! Anytime somebody makes something better, the people that are now "behind" will wine and cry fowl. I believe this to be the case and they should get cracking. People would still be listening to regular radio's traffic and weather, but they just seem to want to play the same 12 songs all day and play 38 minutes of commercials every hour. Thank you for your time and I hope you make a wise decision.
